CAELIX · DISCORD KIT · V1

WEB APP ⇄ DISCORD BOT

Two stations. One crew.

The web app is the workshop, Discord is the table. Both use the same symbols, the same colors and the same words, so a player never has to relearn anything when they switch.

STATION 1 · THE WORKSHOP

caelix.app

Build and level up characters, upload portraits with artist credit, manage Loadout and Vault, Seeds wallet and shop, long-form notes.

create | edit deeply | show off art | Seeds live here only

STATION 2 · THE TABLE

Discord server

Roll the Duality Dice, mark HP and Stress, spend Hope, react with emoji, talk to NPC agents, pass the spotlight.

roll | track fast | play together | Credits on the sheet

Link once

The Operators' onboarding links the Discord account on sign-up.

Sync both ways

HP marked in Discord shows on the web. An edit on the web updates the pinned sheet.

One log

Every roll lands in the session log on the web, with the outcome symbol.

Jump across

"Open on web" on every bot card, "Send to table" on every web roll.

1 emoji = 1 icon

Every custom emoji is the web icon on a hex plate. Same shape, same meaning, same name.

Same colors, same words

The card accent is the outcome color. Bot lines come from the same Crew Voice library as the web.

Dice are never AI

Rolls and math come from the deterministic bot. AI agents talk, remember and suggest, and always wear their label.

EMOJI SET · CORE

Every symbol sits on a cell.

A solid hex plate keeps each emoji readable on Discord's dark and light themes. Color says which resource or die, fill says success (solid) or failure (hollow).

ROLL OUTCOMES

Critical Success	Success with Hope	Success with Fear	Failure with Hope	Failure with Fear
:cx_crit:	:cx_success_hope:	:cx_success_fear:	:cx_failure_hope:	:cx_failure_fear:

RESOURCES · FULL AND EMPTY SLOT

HP	Stress	Armor	Hope	Fear · GM	Credits
:cx_hp: · :cx_hp_empty:	:cx_stress: · :cx_stress_empty:	:cx_armor: · :cx_armor_empty:	:cx_hope: · :cx_hope_empty:	:cx_fear: · :cx_fear_empty:	:cx_credit:

VALUES AND MOMENTS · GRAPHITE PLATE, GLYPH COLORED BY MEANING

Evasion	Proficiency	Experience	Spotlight	Rest
:cx_evasion:	:cx_proficiency:	:cx_experience:	:cx_spotlight:	:cx_rest:

Wax for fixed values, Honey for Experiences (they cost Hope), Nectar for the Spotlight, Chlorophyll for Rest. They label numbers and actions on the sheet and in rolls, so they have no empty version.

CONDITIONS · DARK PLATE, COLORED RIM

Hidden
:cx_hidden:
Rolls against it have disadvantage. The dashed rim fades into the shadows.

Restrained
:cx_restrained:
Can't move, can still act. Two locked chain links.

Vulnerable
:cx_vulnerable:
Rolls against it have advantage. A shield with a crack.

How the bot uses them

A "Conditions" line on the sheet card. When you roll against a Hidden or Vulnerable target, D-12 applies disadvantage or advantage on its own and shows the emoji next to the die.

DUALITY DICE · 24 FACES, SHOWN AS THEY ROLL

:cx_hope_1…12:	1	2	3	4	5	6	7	8	9	10	11	12
:cx_fear_1…12:	1	2	3	4	5	6	7	8	9	10	11	12

LOGO EMOJI

:cx_logo: :cx_caelix:

:cx_logo: is the Glyph level, for inline use. :cx_caelix: is the Compact level, for reactions and big "jumbo" emoji.

AT CHAT SIZE · 22PX

23 with Hope ·

9 with Fear ·

Tested on the dark and light themes.

EXPORT SPEC

128 × 128 PNG, transparent, under 256 KB

8 px safe margin · plate always solid · glyph stroke at least 8 px

Names: cx_ prefix, snake_case, English

Bot emoji (dice faces, slots, outcomes) uploaded as application emoji of the bot, so they don't use the server's emoji slots

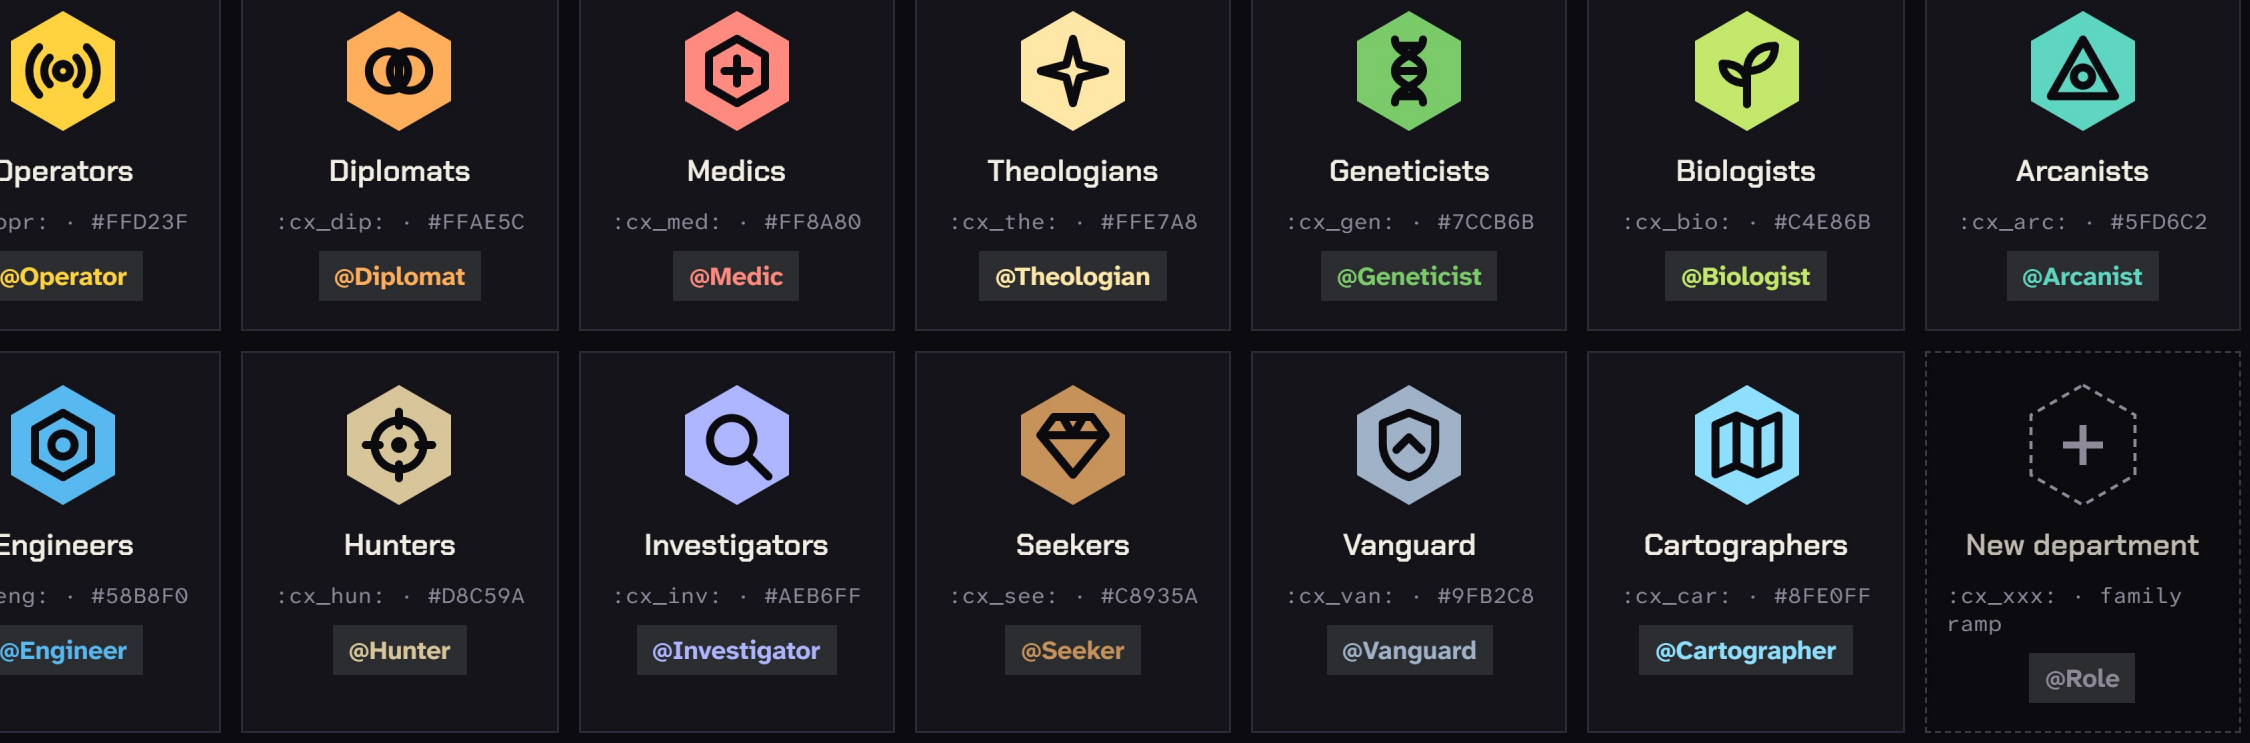

Server emoji: logo and departments, for people to react with

EMOJI SET · DEPARTMENTS

One color per department.

The role color is also the emoji plate, so a name in chat and a badge on a card read as the same thing. Warm tones for Network, greens and blues for Greenhouse, earth and sky for Expedition.

NETWORK · people & comms | GREENHOUSE · science & life | EXPEDITION · field & exploration

SERVER ROLES · ABOVE THE DEPARTMENTS

@Crew Lead
#E8A20C · Honey
Staff and moderators.

@Game Master
#A48CFF · Fear ink
GMs hold Fear, so they wear its color.

@Worldbuilder
#D6C9FF · UV haze
Lore writers, access to the Keeper.

@Recruit
#BFBAAD · Wax 2
New members until the Operators assign a department.

@AI Crew
#F2EEE4 · Wax
Every AI agent, so they're always recognizable.

ADDING A DEPARTMENT

1. Pick the family. 2. Pick a free color from its ramp. 3. Draw the glyph on the 24 px grid, 2.3 stroke, round caps. 4. Name it cx_ + a three-letter code.

SPARE COLORS PER FAMILY

RESERVED

Ultraviolet is reserved for Fear, Stress and the GM, and HP red for damage. No department gets them, so an outcome never gets mistaken for a name.

Light theme: the pale yellows lose contrast on white. The emoji next to the name carries the identity.

EMOJI SET · DOMAINS & GEAR

Cards are cards. Gear is gear.

Domains get the shape of a domain card, not a hex, so they never look like a department. Equipment keeps one drawing and changes color with the tier. The glyphs are original CAELIX drawings, not the official domain symbols.

DOMAINS · CARD SILHOUETTE, DOMAIN COLOR

Arcana	Blade	Bone	Codex	Grace	Midnight	Sage	Splendor	Valor
:cx_arcana:	:cx_blade:	:cx_bone:	:cx_codex:	:cx_grace:	:cx_midnight:	:cx_sage:	:cx_splendor:	:cx_valor:

Arcana innate magic · Blade weapon mastery · Bone tactics and the body · Codex magical study · Grace charisma · Midnight shadows and secrecy · Sage the natural world · Splendor life · Valor protection. Colors follow the domain colors players already know, shifted into the CAELIX palette.

EQUIPMENT · SAME DRAWING, ONE COLOR PER TIER

	Tier 1 · Smoke level 1 · #8E8A9A	Tier 2 · Chlorophyll levels 2–4 · #7CCB6B	Tier 3 · Cobalt levels 5–7 · #7DA8FF	Tier 4 · Ultraviolet levels 8–10 · #8F6BFF	Tier 5 · Nectar homebrew · #FFD23F
Primary weapon	:cx_weapon_primary_t1:	:cx_weapon_primary_t2:	:cx_weapon_primary_t3:	:cx_weapon_primary_t4:	:cx_weapon_primary_t5:
Secondary weapon	:cx_weapon_secondary_t1:	:cx_weapon_secondary_t2:	:cx_weapon_secondary_t3:	:cx_weapon_secondary_t4:	:cx_weapon_secondary_t5:
Armor	:cx_armor_gear_t1:	:cx_armor_gear_t2:	:cx_armor_gear_t3:	:cx_armor_gear_t4:	:cx_armor_gear_t5:
Combat wheelchair	:cx_wheelchair_t1:	:cx_wheelchair_t2:	:cx_wheelchair_t3:	:cx_wheelchair_t4:	:cx_wheelchair_t5:
Item · rings & gems	:cx_item_t1:	:cx_item_t2:	:cx_item_t3:	:cx_item_t4:	:cx_item_t5:
Consumable · potions	:cx_consumable_t1:	:cx_consumable_t2:	:cx_consumable_t3:	:cx_consumable_t4:	:cx_consumable_t5:
Custom item	:cx_custom_item:	A keepsake tag on a cord: something that matters to the character's story, not to their wallet. No tier, so it sits on Parchment (#E3CFA8) instead of a tier color.			

Tiers 1–4 follow the SRD glossary (tier 1 = level 1, tier 2 = levels 2–4, tier 3 = 5–7, tier 4 = 8–10). Tier 5 is a hypothetical CAELIX tier. The breastplate is the armor item; the shield (cx_armor) stays the slot you mark.

Damage Thresholds

:cx_thresholds:

Three steps, 1 · 2 · 3 HP. Values family, glyph in HP red.

Experience Points

:cx_xp:

"XP" plus a progress bar, so it never reads as an Experience.

Good to know

The SRD has no XP track (the GM decides when the party levels up): cx_xp is for a CAELIX progress track, if you add one. Tier 4 and 5 borrow Ultraviolet and Nectar: on the equipment hex with a dark glyph they don't read as Stress or a critical.

SHEET TRACKER · DICE ROLLER

Three names for the bot.

The bot is the only one allowed to touch dice and numbers. It should feel like reliable ship equipment: short name, instant to type, easy to spot in a busy channel.

RECOMMENDED

D-12

"Dee" · the drone from the logo

The ape-drone in the cell, finally with a name. D-12 is its drone serial and the two d12s of the Duality Dice: the pun explains itself at every roll.

D-12 APP
Tavor · Agility attack → **23 with Hope**. The scene is yours.

HUD readouts · crew radio · Honey accent

Reuses the logo · ownable · lore-native

Waggle

the waggle dance

Bees dance to tell the hive what they found. Waggle "dances" every roll to the table. Friendly and playful, great for a younger crew.

Waggle APP
Tavor lands a **23 with Hope**! Nice flight.

playful · celebratory · Honey plate

Cute but less "tech"; the name is less searchable

Comb

every sheet is a cell

The honeycomb that stores every character. Calm and precise, like a ship's ledger. It would also carry over well to a future compendium.

Comb APP
Tavor — Agility attack · 23 (Hope) vs 12 · **Success**

ledger · minimal · Scafo plate

Cold for newcomers; a generic English word

/roll	/sheet	/mark · /clear	/fear
Trait, Experience, advantage. Autocomplete from the linked sheet.	The pinned card, with a "View" menu and "Open on web".	HP, Stress, Armor, Hope. Buttons on the card do the same.	GM only. Shows and spends the table's Fear.

D-12 APP Today at 17:10

VANGUARD · VAN-0112

Orin Vale

Level 1 · Guardian (Stalwart) · 0/200 XP

Human · Ridgeborne

OV

Art: @artist

AGI 0 | **STR +2** | FIN −1 | INS +1 | PRE +1 | KNO 0

[Roll] [Mark HP] [Mark Stress] [Rest] [Open on web ↗]

View

Summary ⌄

Synced with caelix.app · 17:10

/SHEET · REDESIGN

The same sheet as the web, sized for chat.

Department accent

The side bar and badge take the department's role color. Orin is a Guardian, so Vanguard.

Portrait with credit

The web portrait is the thumbnail. The artist's name travels with it.

Traits as chips

Six monospace chips. The highest trait is bold so it's found at a glance.

Emoji slots instead of ANSI

The colored code block only works on desktop. Emoji slots look the same on mobile and on the light theme, and the count is written out for screen readers.

Actions on the card

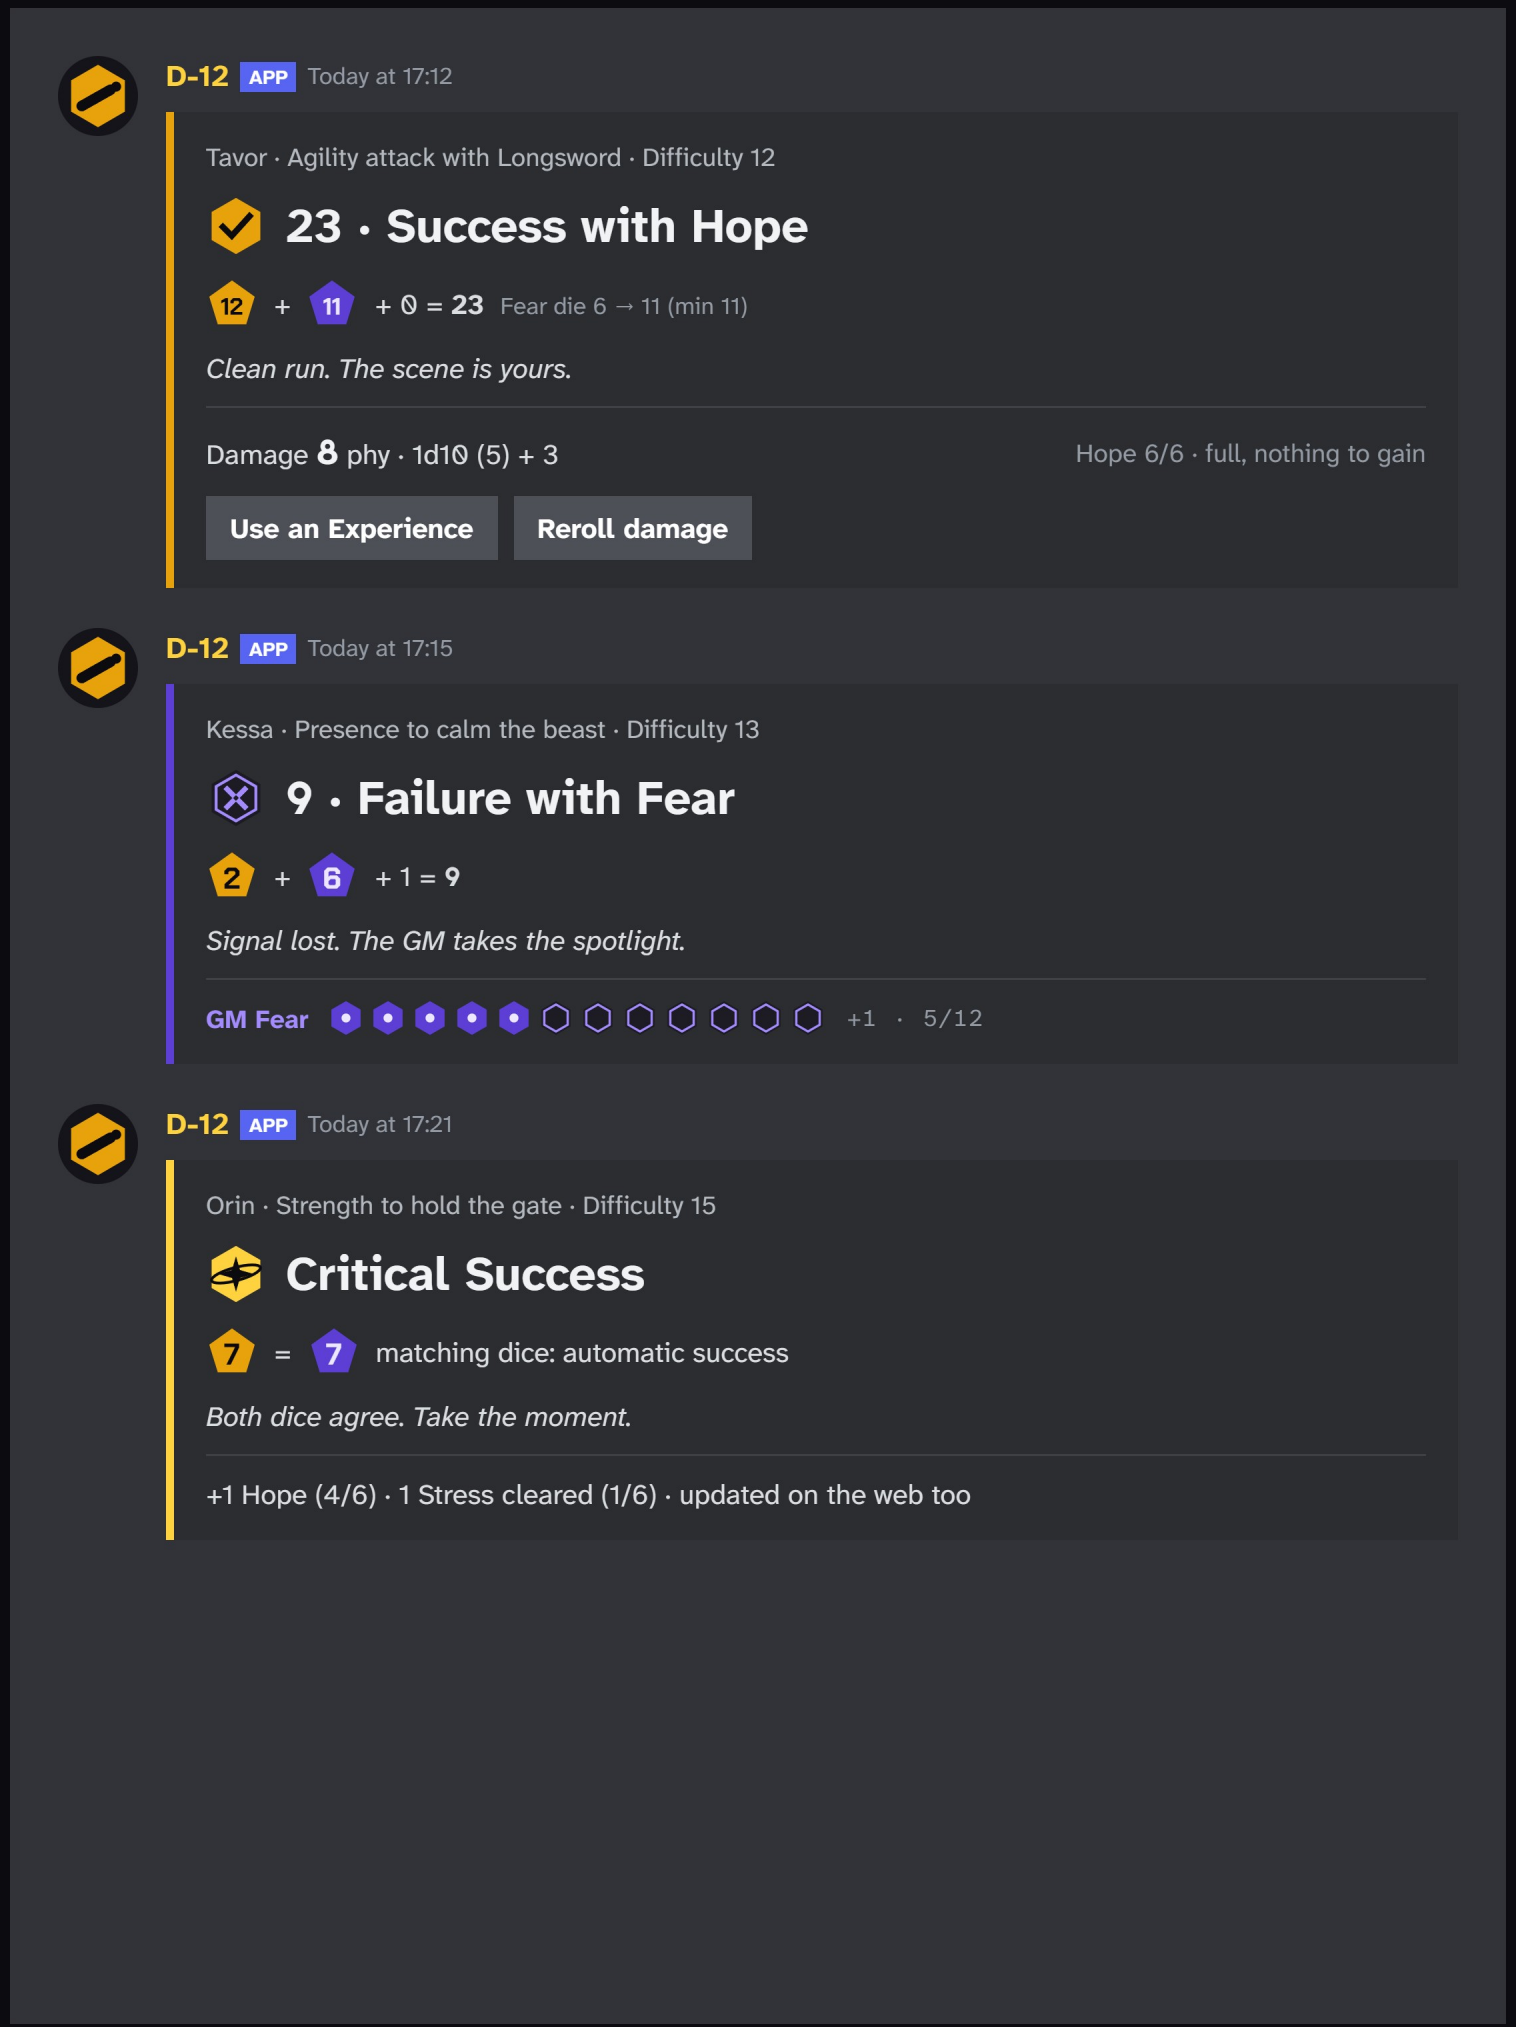

Roll, mark and rest without typing a command. "Open on web" goes straight to the same character.

Views, not walls of text

The "View" menu swaps the lower half: Summary, Traits & Experiences, Loadout & Vault, Inventory & Credits, Features.

Build it with components v2

Container, sections, separators and a thumbnail accessory. A classic embed can follow the same order as a fallback.

/ROLL · RESULT CARD

Outcome first. Math second.

The card is read top to bottom: who and what, the outcome with its symbol and color, the dice, a crew line, then what the bot updated on its own. The formula goes in the dice row, not in the headline.

Critical · +1 Hope, clear 1 Stress	#FFD23F
Success with Hope · +1 Hope	#E8A20C
Success with Fear · GM +1 Fear	#8F6BFF
Failure with Hope · +1 Hope	#9A5A04
Failure with Fear · GM +1 Fear, spotlight to GM	#5E3FD6

Dice as emoji

24 face emoji (Hope 1–12, Fear 1–12) show the dice as they rolled. A modified die shows its final value, with the original in grey.

Reaction rolls

Same card with a grey bar and no Hope/Fear line: reactions don't generate either.

AI ASSISTANT · FOR PLAYERS

A voice that helps, never judges.

The assistant explains rules in one line, suggests what a player can do right now, and prepares actions for the bot. It doesn't roll dice and doesn't change sheets without the player confirming.

RECOMMENDED

Vega

the Operator who welcomed you

Already the onboarding voice on the web. Named after a bright star, with an Operator's headset. Warm and patient, uses the crew's tone.

Kessa: what can I do with my Hope?

Vega APP You have 3 Hope. Spend 1 to add an Experience (+2) to your next roll, or 3 for your class Hope Feature. Should I get that ready?

Hum

the sound of the hive

An ambient helper, always in the background. Very short, gentle hints. Easy to call ("ask Hum") and hard to confuse with an NPC.

Kessa: what can I do with my Hope?

Hum APP 3 Hope ready. +2 with an Experience, or your Hope Feature.

Beacon

the light that points the way

A guide that always suggests the next step. Clear but less personal. Useful if the assistant ends up mostly doing tutorials.

Kessa: what can I do with my Hope?

Beacon APP Next step: add an Experience to your roll (1 Hope). Tap "Use an Experience".

LORE KEEPER · FOR GMS & WORLDBUILDERS

The Keeper

alternatives: The Archive · Old Comb

The memory of the Hive. It answers from canon and cites the source (a session recap, a lore page). It keeps what's canon apart from what's a draft, and never presents an invention as a fact.

GM Lia: who runs the Seed Vault?

The Keeper APP **Canon:** the Geneticists (Lore › Departments, Session 12). **Not defined yet:** the current director. Want three options, marked as draft?

WHY THIS PAIR

Vega faces players: close, warm, in the Operators' voice. The Keeper faces the people who write the world: sober, sourced. Two roles, two looks, never confused.

Both wear the @AI Crew role and the wax-white color.

AI CREW · ROSTER

Who's who on board.

One bot handles the numbers, the agents handle the words. Each has its own avatar frame, so you know at a glance whether you're talking to a machine, a guide or a character.

FRAME	AGENT	JOB	WHERE · WHO	TYPE
	D-12	Dice, sheets, resources, GM Fear, sync with the web.	Every game channel · everyone	DETERMINISTIC · NOT AI
	Vega	Welcomes recruits, explains rules, prepares actions for D-12.	#welcome, help threads, DMs · players	AI · GUIDE
	The Keeper	Lore memory: answers from canon with its sources, drafts marked as drafts, continuity checks.	#lore-desk · GMs and Worldbuilders	AI · LORE
	NPC agents	Ship characters with their own persona. The hex frame takes the NPC's department color.	Scene and downtime channels · called by the GM	AI · CHARACTER
	Chronicler proposal	At the end of a session it writes the recap and hands it to the Keeper, pending the GM's approval.	#session-log · runs when the GM ends the session	AI · SCRIBE

AN NPC IN CHAT

Chief Irel · Engineers NPC · AI

The reactor on deck 4 is singing out of tune again. If you want to go down there, bring someone who isn't afraid of the dark.

Name in the department's color, "NPC · AI" tag in the name, hex frame on the avatar. Players' characters use round avatars.

TRUST RULES · ALL AGENTS

Always labeled as AI, in the name and in the role.

They never roll dice or change sheets: they prepare, the player confirms, D-12 executes.

They step out of character when a safety tool is used (/pause, /rewind) and hand over to the GM.

NPCs never start private messages. GMs can pause any agent and read its logs.

Content filtered for a teenage audience.
