05 · SETTING

Thirteen departments, one Hive.

Every member of the Interstellar Protection Association (API) belongs to a department. Three families (Network, Greenhouse, Expedition) group them by kind of work; each department has its own role color, which is also the plate of its emoji.

Network · people & comms

Greenhouse · science & life

Expedition · field & exploration

Operators

OPR

NETWORK

New recruits, ship comms and the onboard social network. The first voice you hear.

ENTRY DEPARTMENT · EVERY NEW RECRUIT STARTS HERE

Geneticists

GEN

Hunters

HUN

GREENHOUSE

The code of life: hybrids, ancestries, anthropomorphic crew. Keepers of the Seed Vault.

EXPEDITION

Track and contain alien fauna and threats that got loose.

Diplomats

DIP

NETWORK

Treaties and mediation between species and factions. They talk before anyone shoots.

Biologists

BIO

GREENHOUSE

Greenhouses, ecosystems and deck flora. They keep the Hive in bloom.

Medics

MED

NETWORK

Crew care, triage on missions, recovering HP and Stress.

Investigators

INV

EXPEDITION

Mysteries, strange signals, investigations across the ship's sectors.

Theologians

THE

NETWORK

Star cults and keepers of meaning. They listen to what the cosmos says.

Arcanists

ARC

GREENHOUSE

Anomalous energies and technomagic. They study what science can't explain.

Engineers

ENG

GREENHOUSE

Hull, solar reactors, drones. If it breaks, they fix it better.

Seekers

SEE

EXPEDITION

Wrecks, relics and salvage. They always come back with a few extra Combs.

Vanguard

VAN

EXPEDITION

The front line: boarding, escorts, defending the decks.

Cartographers

CAR

EXPEDITION

Routes, star charts, exploring the unknown.

The list is still open: departments can be added, merged or renamed. Each new one needs a family, a free color from that family's range, a glyph and a three-letter code.

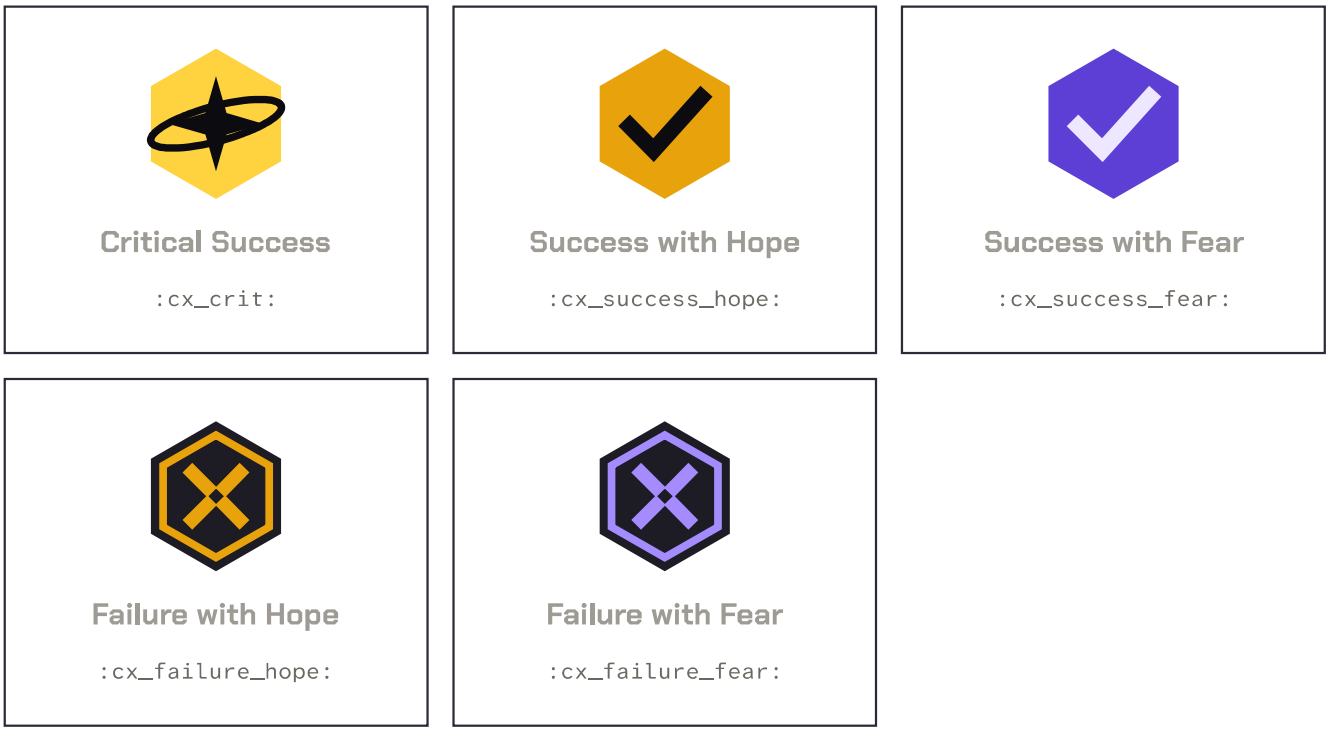

06 · ICONS & EMOJI

Thin line on the web, solid cell in chat.

One drawing, two finishes. In the web app icons are 1.6px line work on a 24px grid. On Discord the same glyph sits on a solid hex plate, so it stays readable at 22px on both the dark and light themes.

Roll outcomes

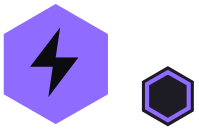

Color says which die won (Honey = Hope, deep UV = Fear). Fill says the result: a solid plate is a success, a hollow plate is a failure. That way the outcome reads even without color.

Resources · filled and empty slot

HP

Spotlight

`:cx_spotlight:`

Rest

`:cx_rest:`

Damage Thresholds

`:cx_thresholds:`

Experience Points

`:cx_xp:`

Graphite plate, glyph colored by meaning: Wax for the fixed values (Evasion, Proficiency), Honey for Experiences (they cost Hope), Nectar for the Spotlight, Chlorophyll for Rest (it recovers). They label numbers and actions, never a count, so they have no empty version.

Domains

Arcana	Blade	Bone	Codex	Grace
:cx_arcana:	:cx_blade:	:cx_bone:	:cx_codex:	:cx_grace:

Midnight	Sage	Splendor	Valor
			
:cx_midnight:	:cx_sage:	:cx_splendor:	:cx_valor:

Domain emoji take the silhouette of a domain card, so they never read as a department. Colors follow the domain colors players know, shifted into the CAELIX palette. The glyphs are original CAELIX drawings, not the official domain symbols.

Equipment

	Tier 1 · Smoke level 1 · #8E8A9A	Tier 2 · Chlorophyll levels 2-4 · #7CCB6B	Tier 3 · Cobalt levels 5-7 · #7DA8FF	Tier 4 · Ultraviolet levels 8-10 · #8F6BFF	Tier 5 Necta homebr #FFD23

:cx_consumable_1 :cx_consumable_1 :cx_consumable_1 :cx_consumable_1 :cx_co

Custom item

:cx_custom_item

A keepsake tag on a cord: it matters to the character's story, not to wallet. No tier, so it sits on Parchment (#E3CFA8).

Same drawing, one color per tier. Tiers 1–4 follow the SRD glossary: tier 1 = level 1, tier 2 = levels 2–4, tier 3 = 5–7, tier 4 = 8–10. Tier 5 is a hypothetical CAELIX tier. The breastplate is the armor item; the shield (cx_armor) stays the slot you mark. The SRD has no XP track (the GM decides when the party levels up): cx_xp is for a CAELIX progress track, if you add one.

Conditions

Hidden

:cx_hidden:

Rolls against it have disadvantage. The dashed rim fades into the shadows.

Restrained

:cx_restrained:

Can't move, can still take actions. Two locked chain links.

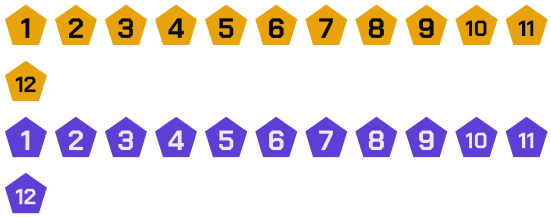

Vulnerable

:cx_vulnerable:

Rolls against it have advantage. A cracked shield.

Conditions use a dark plate with a colored rim, so they never look like a resource or an outcome. On the web they're chips on the portrait; in the bot they're a line on the sheet card and appear next to the die when they add advantage or disadvantage.

DUALITY DICE · 24 FACES

:cx_hope_1: … :cx_hope_12: and :cx_fear_1: … :cx_fear_12:. The bot shows the dice as they rolled.

LOGO EMOJI

:cx_logo: Glyph level, inline.
:cx_caelix: Compact level, for reactions and jumbo emoji.

EXPORT SPEC

128 × 128 PNG, transparent, under 256 KB. 8px safe margin, solid plate, glyph strokes at least 8px. Names use the `cx_` prefix, snake_case, English. Bot emoji (dice, slots, outcomes) are uploaded as the bot's application emoji, so they don't take up server slots.

GMs wear Fear ink because they hold Fear. AI agents all share Wax, so they're always recognizable.

RESERVED COLORS

Ultraviolet (Fear, Stress, GM) and Sting (HP) never go to a department, so an outcome is never mistaken for a name.

LIGHT THEME

The palest yellows lose contrast on white. The department emoji next to the name carries the identity.

07 · CHARACTER SHEET

Tap a trait. The ship does the rest.

The sheet assembled from the system's components. It works: pick a trait and roll the Duality Dice, and Hope, GM Fear, Stress and Experience costs update on their own. Seeds never appear here: the character's money is Credits.

08 · CREDITS

Cell Credits: the character's money.

The API pays in cells, and they pile up like honey. Credits are game money: earned and spent in the story, shown on the sheet and in the bot, and never bought with euros or Seeds.

¢

Credit

1 ¢ · everyday spending

×10

Comb

10 ¢ · gear, favors, information

×10

Apiary

10 Combs · mission treasure, shuttles, property
